

RTMS

digital & data-driven
grant management system for
civic engagement initiatives

*developed by Luna Maltseva for SIDP
in collaboration with AUCA CCE*

Let us share the data we brought...

Artemis CE has affected **831 people** over **2 semesters**

93% of project leaders wish to continue their project,
so *we must prepare them* to do so

Project leaders most often require our support in managing:

Funds

Time-management

Audience Engagement

Logistics

Coordination

...

Civic Engagement is traditionally narrative-based

“*With every session the connection between volunteers and children became stronger and smiles with hugs appeared more often.*”

—“Create Together”

“*But seeing those local city kids and the rural students actually sitting at the same table, debating and sharing ideas? That made the stress worth it.*”

—“Model UN’ in Karakol”

“*[The project] showed that meaningful change is possible in rural areas, and this project can grow and reach more communities in the future.*”

—“Youth Diplomacy 02”

...yet the world is becoming data-oriented

Artemis CE finds that a data-oriented framework makes projects **4 times more likely** to be greenlit.

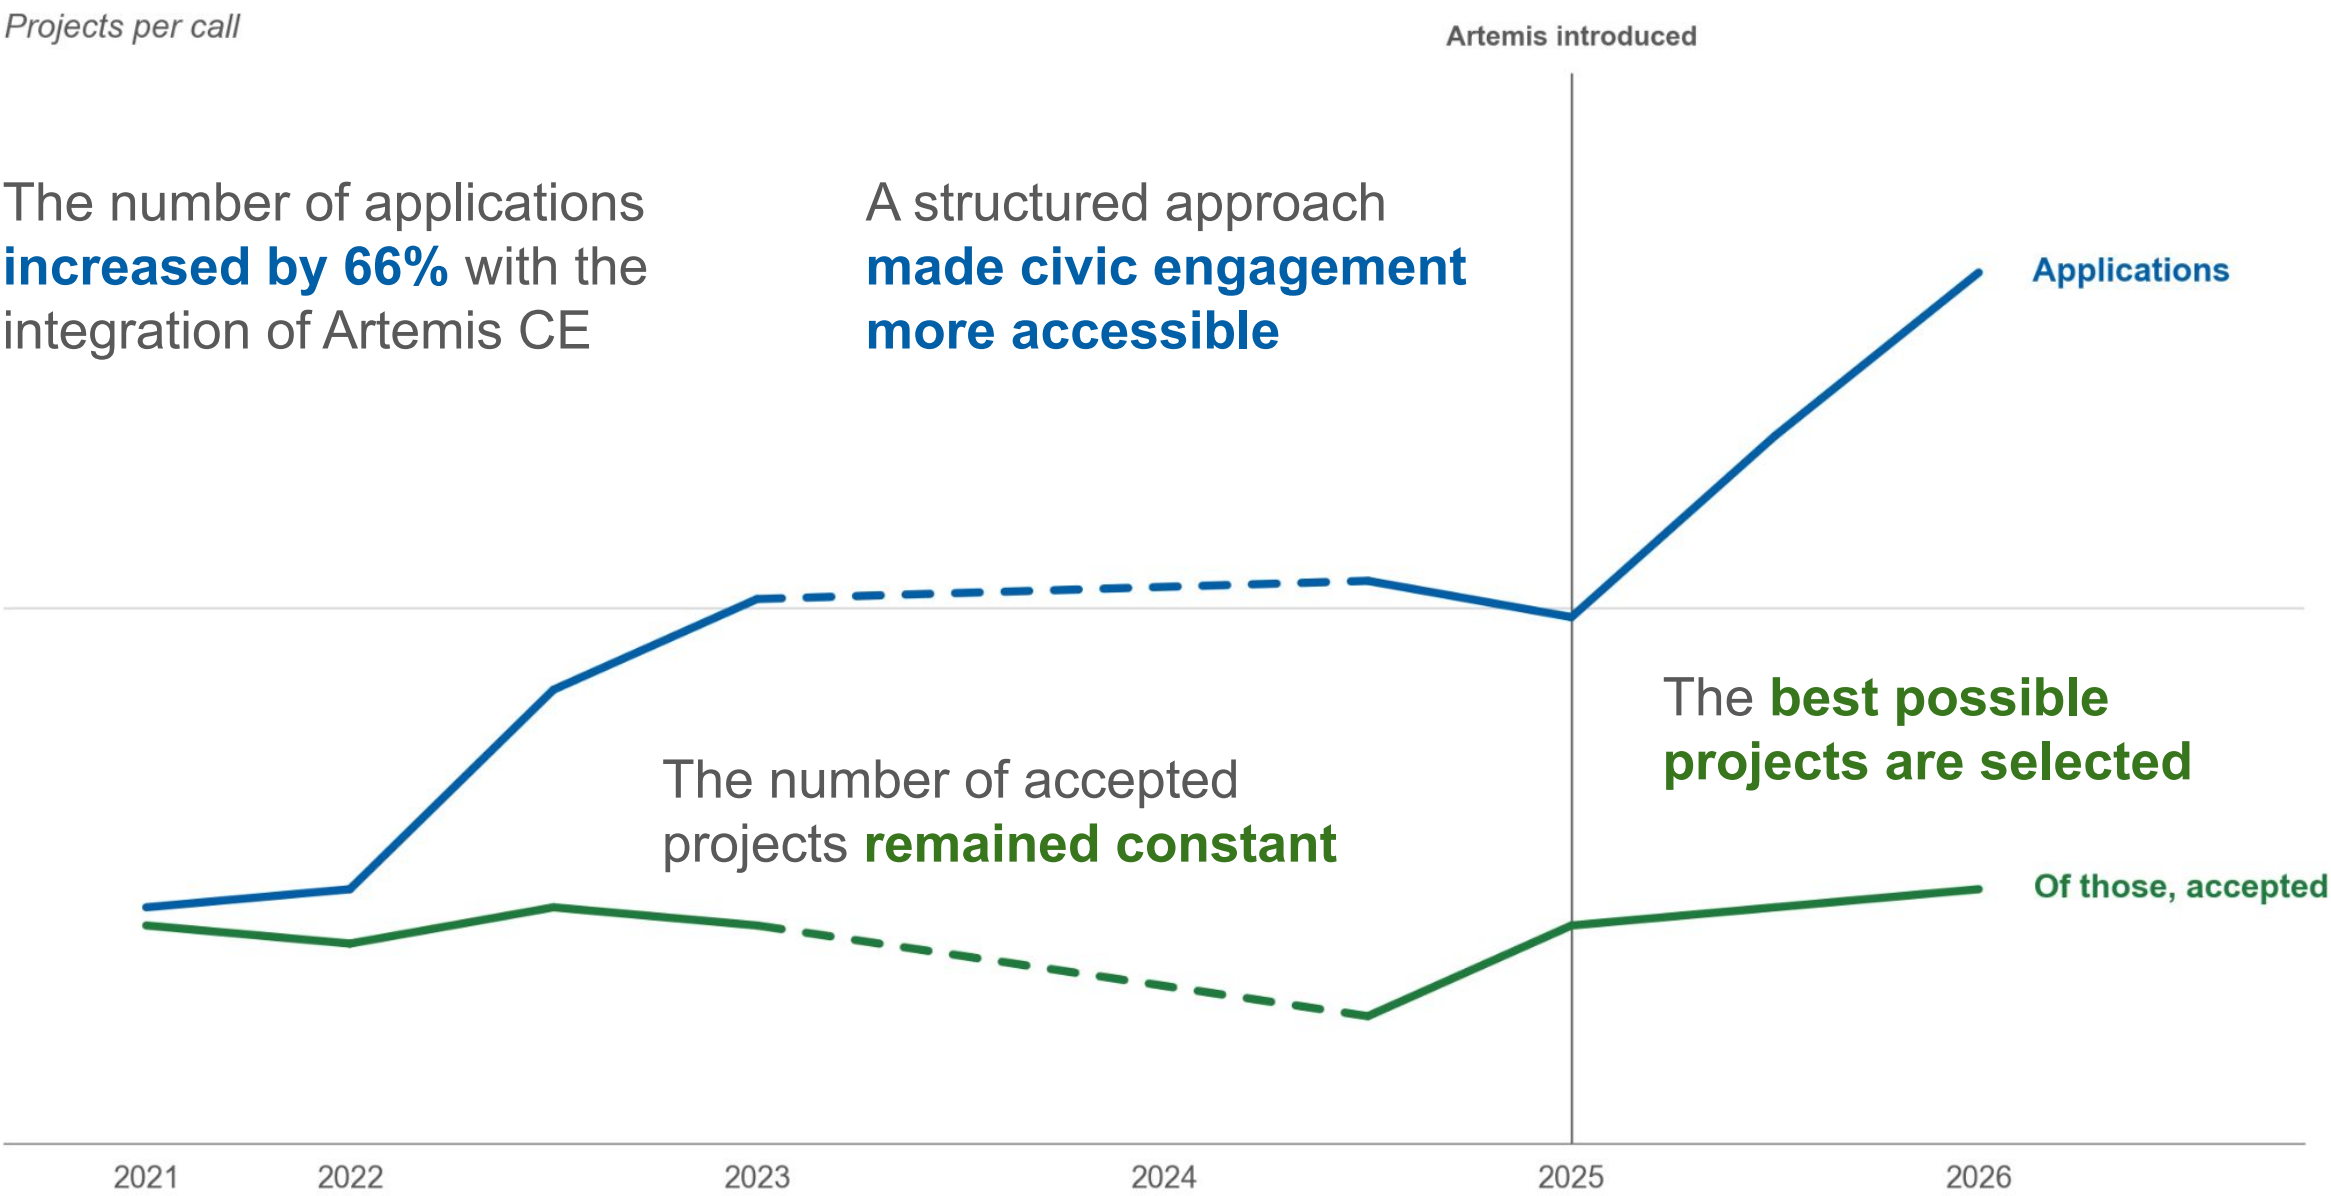

Analysis indicates that the finding is statistically significant.
[*Pseudo $R^2 = 0.1$, LR p-value = 1.6%*]

Artemis is a structured merge of narratives and data

“Artemis CE is a digital grant management system designed for the field of Civic Engagement which places a heavy accent on data collection, statistical inference, and analytical insights.”

Improvements in efficiency cascade

Goal: Launch Artemis CE in February 2027

Jan 2025

Conceptualization starts

Oct 2025

Deployed

Feb 2026

Polished, deployed

May 2026

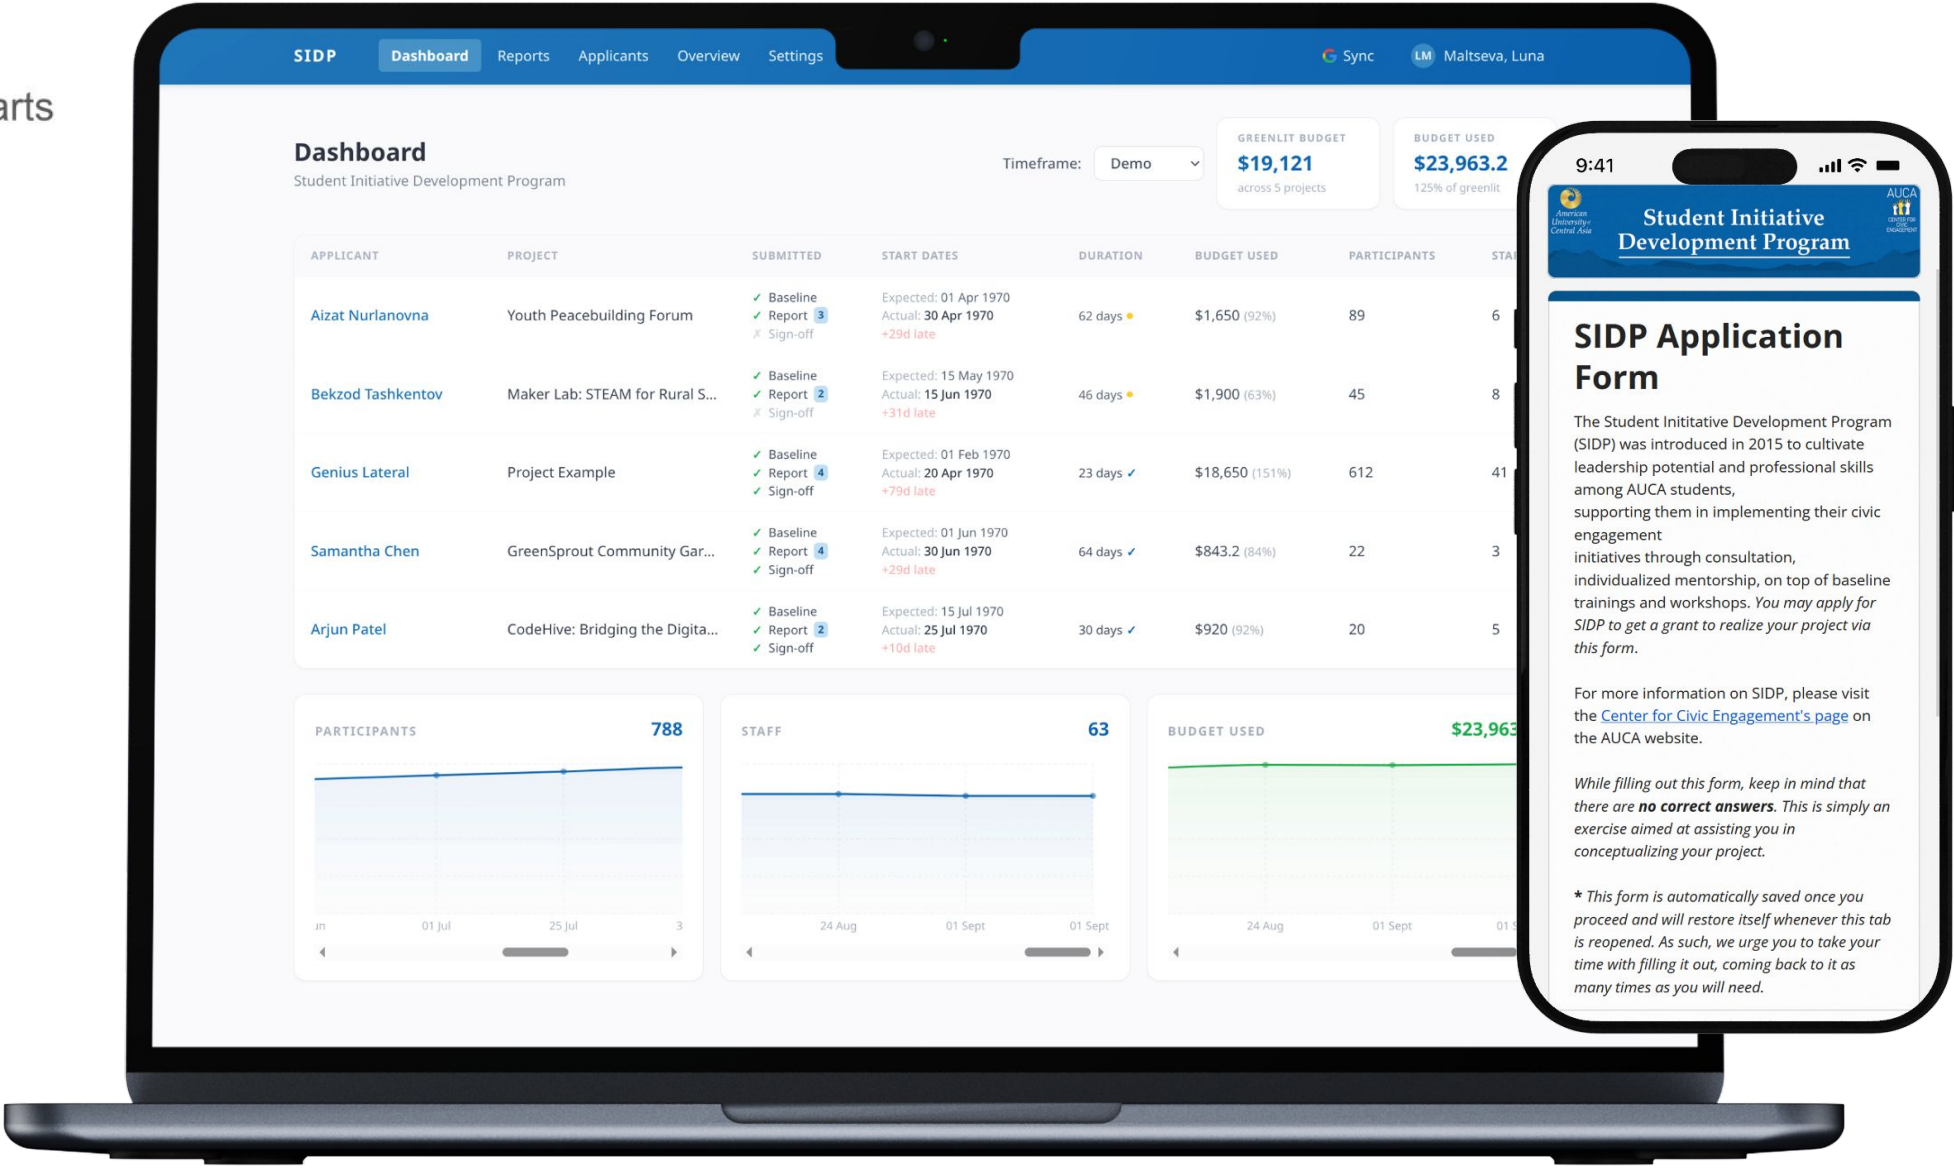

Development starts

Oct 2026

Soft launch

Feb 2027

Full launch

digital & data-driven
